

Sirs,
consolidation of ownership of media is the most threatening action
the US government has contemplated in 250 years. to say that the
competitive situation is different today as there are so many more
media outlets is equivalent to saying that because there are so
many Walmart stores in an area, there is a great deal of retail
competition. media outlets with common ownership do not enhance
competition.
please reconsider your decision. the action you take on June 2
will shape the dialog of our nation for years to come. please
insure that it is a one of many voices. afterall, ownership of
media can change...and your viewpoint might well be the one not
represented in the future.
many thanks for your attention.
